

Dear Kiwis,

Unless we **act now** these are our predictions for the next election:

LABOUR WILL TANK

GREENS AND THE MĀORI PARTY WILL STAGNATE

NZ FIRST WILL MAKE A MODEST COME-BACK

NATIONAL WILL ROMP IN AND FORM THE NEXT GOVERNMENT BUT WITH ACT AS ITS COALITION PARTNER

OTHER THAN GAINING 1-2 SEATS, MINOR PARTIES WILL FAIL, SPLITTING THEIR VOTES

NOTHING WILL REALLY CHANGE

IS THIS WHAT YOU WANT?

Labour and its support parties are anathema to a demographic that values freedom, independence, and national sovereignty.

Ridding ourselves of Labour is a goal shared by many people. But few people, including many National Party supporters, understand that a National Government under the leadership of Christopher Luxon will not restore our democracy and will be more of the same – arguing over funds spent on this or that while our country slowly loses its democracy. But they will retain and even enhance their power to override your freedoms and your rights.

The last two years should have been a wake-up call. Are our Members of Parliament working for us or for outside forces? Are they doing this deliberately? Or unknowingly and ignorantly? It used to be a conspiracy theory that the World Economic Forum (WEF), in collaboration with the UN and a few obscenely wealthy people, planned to implement rules and restrictions across the globe, "to take over the world," – a One World Government.

In the last half decade, this process has been renamed by the WEF as the "Great Reset." It is closely linked to the UN's "Agenda 2030".

This is not a conspiracy theory. The leading players no longer conceal their plans. Our Prime Minister, Jacinda Ardern, a poster child of the WEF's "Global Leaders Initiative," is one of the most enthusiastic supporters of these agendas and one of the first to pledge her country to the cause.

DID YOU KNOW...

We have been signed up to be the guinea pig in the WEF's AI (Artificial Intelligence) project,

"Reimagining Regulation for the Age of AI: New Zealand Pilot Project 2020"

under the guise of protecting people's privacy.

See link here:

<https://www.weforum.org/whitepapers/reimagining-regulation-for-the-age-of-ai-new-zealand-pilot-project>

We are witnessing this government's ongoing intentions unfold in the legislation over the last two years that has taken away people's rights and freedoms. We have seen executive orders keep Kiwis out of their own country. We have seen these MPs advance *Agenda 2030* and undermine our democracy in the process. And not one MP in the last two years has stood up for you and questioned this government! It is **Us vs Them**.

Did you vote for any of this?

THE DEMOCRACY PROJECT

Many people are disillusioned by our current system of government. Many people have said they will no longer participate, including not vote. **But not voting will only ensure the status quo remains – You lose: We all lose!**

A former ACT leader and other senior and long-time ACT party members confirm that **it would take only a handful of members to take over the ACT Party**, and we number in the hundreds of thousands – not thousands. ACT stands for freedom, as well as an abhorrence of Government overreach, but people argue that it has lost its way. Many members of ACT will welcome us because we will rejuvenate the party and get it well past the 5% threshold for the Party Vote. As financial members we can influence Party policy and put the right people on the Party list.

We must be active and participate strategically in the system as it is:

For people who feel the establishment does not represent their values, the obvious solution is to become the Establishment and bring about change from within.

WHAT DO WE DO NOW?

There are enough of us to be a potent force within NZ politics; but only if we are all in the same waka, paddling in unison. ACT is the most obvious waka to paddle – look at ACT's [Constitution](#) and [policies](#).

If we play it right, ACT will determine which party is in power, following the next election – It will have a big say in setting Government policy, and we want the rights and freedoms of everyday Kiwis to be of paramount importance, as is the need for New Zealand to have security and control of its essential services and resources such as water, energy, food production, education and healthcare.

If you are serious about turning around our country, saving our democracy, resetting New Zealand politics, then follow these simple steps:

- 1 Join the ACT Party** by registering online and paying your membership. Get two friends to join the party with you!
- 2 Forward proof** of joining (the Act Party confirmation email) to this address: democracyproject@proton.me
- 3 Wait for further instructions**

Open your eyes, be brave and stand your ground because powerful elites are close to having complete control over New Zealand.

We must not allow this to happen. Not for us, or our children. Take back your country for future generations.
